Please indicate how the ISCO08 was derived.

In order to study the transition to ISCO08 more closely please deposit any national occupational variables used in the transition to ISCO08.

10.1 Classification used in coding of occupation (mark one only):

- First coded to a national classification *based on* ISCO and then bridged to match the ISCO08 ☐
- First coded to a national classification and then bridged to match the ISCO08 ☐
- No previous coding, occupation coded directly into the 4-digit ISCO08 ☒

10.2 Occupation coding procedures:

When did the coding of occupation for respondent and partner take place?

- At the time of the interview ☐
- Later on ☒

10.3 Number of occupation coders: 3

10.4 Were any occupation strings coded by more than one coder (double coding) No

10.5 Was an adjudicator used? Yes

Was adjudication done

- By sampling ☐
- On difficult cases ☒

10.6 Is some kind of automatic/semiautomatic coding used in the coding process? ☐

10.7 Please give a short description of the procedures for coding and the routines for checking the coding (e.g. checked against other coders, against a list of titles, against coding software):

Not only 4 digit codes (ISCO) or 2 digit codes (NACE) were used when coding, but more detailed 5 digit (ISCO) / 4 digit (NACE) codes were ready for checking in case of difficulties while coding. Very simple non-automatic check - occupation X role at work (F33-F34) was done.

10.2 Occupation coding procedures:

When did the coding of occupation for respondent and partner take place?

At the time of the interview ☒

Later on ☒

10.3 Number of occupation coders: 147 + 2

10.4 Were any occupation strings coded by more than one coder (double coding) ☒

10.5 Was an adjudicator used? ☒

Was adjudication done

By sampling ☐

On difficult cases ☒

10.6 Is some kind of automatic/semiautomatic coding used in the coding process? ☒

10.7 Please give a short description of the procedures for coding and the routines for checking the coding (e.g. checked against other coders, against a list of titles, against coding software):

Interviewers coded the occupations into the 5-digit ISCO 08 during the interview. The post coding procedures (coding the unknown cases and converting national 5-digit codes into 4-digit) were done after composing the SAS data set. The FW team conducted a post-coding of unclear occupation classifications after the active FW period had ended.
